The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest "an adjusting unit for substantially matching an image forming relation between the reference plate and the reference mark to the image forming relation between the mask substrate and the wafer, which has been influenced by said optical modulation member, when positions of the reference plate and the reference mark are detected through an optical path of said projection optical system for positioning the mask substrate and the wafer."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
